## Take the right MBA test before joining a B-school

**STEPPING STONE** An entrance test is the first step to get into a top management institution. While there are tests other than the Common Admission Test, you must find out which one suits you best

By Sunit Kuhar

Getting into a B-school is not a cakewalk. You need to make your entrance into the top management institutions more competitive. There are four major entrance tests: the Common Admission Test (CAT), Xavier Aptitude Test (XAT), Management Aptitude Test (MAT), MCA Aptitude Test (NMAAT) and Common Management Aptitude Test (CMAT).

You also need to keep abreast of the latest changes that are introduced in surprise year in more ways than one.

These were introduced in case of the MHCAT (MICA Admission Test), XAT (Xavier Aptitude Test), CMAT (Common Management Admission Test), NMAAT (Narsee Monjee Institute of Management Studies University Entrance Test) and SNAP (Stern School National Aptitude Test).

SNAP that are likely to impact your chance of getting into a top school.

your preparation, but taking strategy,

**MICAT 2016**  
The complete selection process for admission to MHCAT's PGDM Class 180 involved three stages: CAT, SAT and GMAT scores, MAT, XAT, Admission Test (MCAAT) in various cities across India, and (i) group discussion and personal interview (GD and PI).

However, there were two major changes in this season. MICAT was conducted in the previous mode. The second change was that instead of one round, there were two rounds of selection, "says Monica Puri Chahal, president of MHCAT.

Although MICAT had last year the selection process for admission to PGDM was held once in a year, it is now held twice. This year there will be two complete rounds of selection, one in December and January and second in February March.

**XAT 2016**  
The overall XAT pattern was same as

Management aspirants need to keep abreast of the latest changes introduced in case of entrance exams such as Common Admission Test, MICAT, XAT, CMAT, NMAT and SNAP.

a good experience for them in terms of effective taking, before going to the CAT. The February CMAT will be like a semi-diamond-like format, especially for those who can perform well in the logical reasoning, quantitative ability (QA) with 34, 32 and 34 questions, respectively.

Each section had a sectional time limit of 30 minutes. With an average of 33 questions out of 100, there was a surprisingly high number of non-multiple-choice questions across the three sections. This increased the difficulty level.

**CMAT 2016**  
CMAT changed to an annual test this year. The scores will remain valid only for one academic year. This will affect the aspirants to quite an extent.

The earlier CAET was an online test held before the CAT. A number of students give importance to the CAT

## Choosing a B-school? What you must consider

**MUST WATCH FOR** Importance should be given to academic rigour, admission process, academic and intellectual infrastructure resource

By Sunit Kuhar

There are three main criteria that one needs to take into account while choosing a B-school. These are: (i) academic rigour, (ii) admission process and (iii) placement.

Prof Deepak Dharwadkar, professor of marketing at IIM Bangalore, says, "Academic rigour is important as it is the backbone of any educational institution. It is the academic rigour that makes a B-school stand out from the rest."

Placement is also important.

## ENABLING ENTREPRENEURS SETTING THE STAGE FOR A START-UP NATION

The struggle to create jobs in manufacturing sector pushes the govt to promote young entrepreneurs instead

BY PRAKASH K. NANDA &  
MEESAI THAKRE

**R**ealizing that it's tough to create enough jobs in established manufacturing sectors, the National Democratic Alliance (NDA) government over the past two years seems to have adopted a more pragmatic path—promote new-age businesses so that the Gen-X becomes job creators than seekers.

While the country is seeing a start-up revolution, the NDA government has introduced several tax benefits, revised business norms and created other existing incentives to allow such young entrepreneurs to flourish.

Along with small and

medium enterprises, the startups can help absorb a sizeable number of youngsters entering the labour market.

The beginning is good, but experts and the government both seem to have realized that the task is tough as over 12 million youth are entering the job market every year in India.

In 2014, eight key manufacturing and export-oriented sectors, including TCS/BPO, textiles and automobiles, created less than half a million (421,000) jobs, and in 2015, the numbers were less than 290,000, according to the latest figures of the ministry of the Union labour and employment ministry.

The revival in job creation for India's manufacturing and export-oriented sectors is unlikely, thanks to the longer contracts in exports, India's merchandise exports have been contracting for the past 17 months. Experts have been calling for a weak global demand, slide in oil prices and currency fluctuations.

According to commerce ministry data, between April 2013 and February 2016, India's exports contracted 16.7% to \$234.4 billion and imports shrank 14.7% to \$351.8 billion, leaving a trade deficit of \$113.4 billion. Weak demand in struggling overseas markets has hit India's exports.

"Looking at the realities of economy, our government from prime minister down to us has emphasized on creating a better environment for businesses and help new entrepreneurs flourish. The acceleration of more jobs in both traditional and new-age sectors. Big manufacturing industries and start-ups have both found support from different initiatives in last two years," said labour and employment minister Bandaru Dattatreya.

What the minister said resonates in some of his announcement and decisions that the NDA government has taken in the past two years. Finance minister Arun Jaitley in his budget speech on 28 February, sought to unveil what he called the "fourth pillar" of his budget proposals—jobs, education and skill development.

The centre has set aside ₹1,029 crore for 2016-17 to pay a contribution to the Employees' pension scheme for all new employees drawing a salary of up to ₹15,000 a month. The move, termed by some experts as "employment subsidy", will be effective for three years and will perhaps encourage employers to hire more people.

Transport minister Nitin Gadkari, during a conversation with

Shyam Sundar, a labour economist and human resource management professor at XLRI Jamshedpur,

## Govt. to define 'new employees' for EPS

SOMESH JHA

**N**EW DELHI: The government is likely to come out with a definition for the term 'new employees' for implementing its Budget promise of footing the bill for pension scheme contribution in a bid to create more formal sector jobs.

In December, Prime Minister Narendra Modi, while addressing the conference of the Indian Chamber of Commerce and Industry held to mark the 125th anniversary of IIC, Amritsar, said that his government wants to create job cranes and not job seekers.

Modi's speech falls in line with

IIP's electoral policies which

has been fashioned around tap-

ing the aspirations of India's

overwhelmingly young demogra-

phy, especially among the

socially and economically margin-

alized sections of the country.

Big manufacturing

industries and start-ups have

both found support from differ-

ent initiatives in last two years;

both labour and employment

minister Bandaru Dattatreya.

On 18 January, Modi launched the Startup India initiative and announced several measures such as exempting them from labour compliance for three years, no income tax on profits for three years and self-certification for other regulatory compliance.

Besides, he announced the setting up of start-up hubs and labs to facilitate their growth.

"Youth of India must be given

jobs workers to jobs creators," said

Modi as he announced a start-up

fund of ₹10,000 crore for funding

young entrepreneurs.

The general environment is

better in the last two years. The

policies are positive from senti-

ment point of view; the access to government has improved. But the financial aids they have spoken about are for early-stage start-ups," said Hemendra Agarwal, CEO of Aspiring Minds, a start-up in the education and employability space.

Labour economists agree.

"In the last two years, the government has definitely tried to create better environment for jobs through ease of doing business. They have issued several administrative measures to showcase India as an attractive investment destination but it will take some time before the outcome is visible," said K.R. Shyam Sundar, a labour economist and human resource management professor at XLRI Jamshedpur.

He said the government and industry have spoken about investment commitments, but one has to stay on alert on the fact that there is a huge gap between 'intention and actual realization.'

Accordingly, 'new employees' may be defined as those in excess of the average employee base of a firm for the previous three years, a senior labour ministry official said.

### Reimbursement

"The payment of the EPS contribution will be in the form of reimbursements to employers. The scheme will be applicable for the new employees, earning Rs.15,000 a month, who have worked for 240 days during a year in an establishment," the official said.

About 3.5 lakh establishments, which hire more than 20 workers, will be covered

under the scheme, ministry officials said.

### Regulatory fear

"Employment tax subsidy has been tried in Western countries on a limited scale.

"The scheme looks good but it will increase regulation in the labour market which firms would not prefer as there will be increased scrutiny of their books," said K.R. Shyam Sundar, professor of human resource management at XLRI Jamshedpur.

# Independent directors or toothless tigers?

**They do not impact performance or protect minority shareholders. Changes in the law could help raise the bar**

PTIBAS MOHANTY / SUPRITI MITRA

**W**ith the increased focus on shareholders' wealth maximisation as the key corporate objective, regulators worldwide have understood the role independent directors can play to safeguard the interests of minority shareholders.

Clause 49 of the Listing Agreement in India, for example, expects the boards of listed companies with non-executive chairman to have at least one-third independent directors. The board must have at least 50 per cent independent directors if the company has an executive chairman.

### Weak links

While, in principle, it is a good idea to have many independent directors on the board, this in itself does not guarantee that minority shareholders' interests are protected. At the end of the day, independent directors are appointed by executives of the company. Academic research finds companies largely appoint independent directors who remain loyal to the management.

So even if these directors are competent, they do not question the management. This, therefore, raises questions regarding the wisdom in according increasing focus on the number of independent directors. There can be possible reasons why academic research does not find any link between independent directors and financial performance.

It is possible, for example, that the company appoints more independent directors after a disappointing performance. One can-

not expect the performance of such firms to improve overnight.

### Effects on performance

We, therefore, looked at the financial performance of 5,317 companies and 20,999 directors to know the value created by independent directors in India. We looked at the return on equity generated by these firms in three fiscals (2013, 2014 and 2015) to see if there is any link between having more independent directors and the company's financial performance.

We first compared the RoE figures for the companies that have more independent directors than required by the law, and compared that with the RoE for companies that just followed the Clause 49 requirements. As the chart shows, the former companies have actually reported marginally lower return on equity in all the three years that we studied.

Recruiting the right types of independent directors requires expertise and not every company can afford to do it. Section 165 of the Companies Act 2013 specifies that no person can be an independent director in more than 20 companies (including 10 public companies). There is definitely some merit in this rule. However, it creates an artificial shortage in the market for good independent

**Not so independent** That's one of the problems in the corporate world

directors. The number of qualified and effective independent directors is limited and those who are known to be efficient will be hired by big companies.

In fact, group companies can share their knowledge with each other and can ensure that the same independent director is hired by most of the group companies. Academic research shows that companies get the maximum benefit from independent directors when they are members on the board of another four companies. We performed a similar analysis to see if a pattern exists here.

### Sharing independent directors

In India, companies that hire independent directors who are members of another 10 companies get the maximum benefit from it. This pattern is found for companies with all the four ownership groups — MNCs, Indian businesses, public sector enterprises, and others. Our results show companies that hire more independent directors than is legally necessary are not necessarily more profitable. In fact, companies that do not hire more independent directors than is legally

**Improving effectiveness**  
Independent directors can play a more important and useful role in the functioning of the board if

necessary are more profitable. These results indicate shareholders do not necessarily benefit if the board consists of more independent directors. Of course, there may be a selection bias in the sample as the companies that are not doing well probably have hired more independent directors to eliminate possible corporate mis-governance problems.

We also find that independent directors who also serve on the board of 10 other companies prove to be quite valuable to companies. The demand for good independent directors is much higher than the total supply. We find the total number of independent directors to be only 10,978 in our sample.

Given that India has over 5,500 listed firms, the demand for independent directors is high. Only the profitable companies are able to hire the good independent directors. These directors serve on an average on 11 boards (including at least one private company).

### CAMPUS CAPSULE

by M.R. Soothan, member of Legislative Council and vice-chairman, GEPF and Director, MSIRF.

Dr. N.M.B. Naidu, principal, MSIRF, addressed the gathering. Venkatesh G. Shastri, in his address, stressed on time management, project management, leadership skills and team work. He motivated students to update themselves with continuous learning skills.

The Best Outgoing Student awards from each department and also at the college level were presented by the

deans. Around 30 students from all departments were awarded certificates and given cash prizes. Dakshita from the Electronics and Communication Engineering Department was awarded the best outgoing student at the college level.

The institution also awarded three who put up the 25 top innovative projects during Pradarshana.

The Department of Computer Science and Engineering, Rajagiri College of Engineering had organised a conference

Sai Vidyas Institute of Technology celebrated its graduation day recently. R.R. Shetty, regional head, HR, TCS, Bangalore, was the chief guest at the event. Among those present were Prof. M.J. Melo, Director, SVIT and trustees of SVSSV. 490 students received their degrees.

volume" by chief guest R. Gopalakrishnan, director, TATA Sons. He handed over the first copy to Prof. J. Philip, president, XIME. Dr. B. Nageswaran, former director, IIMB, was the chief guest for the ceremony. The event was also attended by Dr. I. Alexander IAS, retired, former chief secretary of Government of Karnataka and chairman, Board of Governance, XIME. Prof. J. Philip, president, XIME and former director, IIMB; Prof. E. Abraham, IAS, founder member and director, XLRI; Prof. J. Ghosh, former chairman, XIME; Prof. Prakash, G. Aper, former director, IIMB and representatives from XIME board.

The convocation was dedicated open by Dr. I. Alexander IAS (retd.), followed by the welcome address delivered by Prof. E. Abraham.

The presidential address was delivered by Prof. J. Philip and Dr. J. Venkatesh, director, XIME, presented a farewell function in honour of all outgoing students belonging to B.E., B.Arch, M. Tech, MBA and MCA.

Prof. S. Ramaiah Institute of Technology organised a farewell function in honour of all outgoing students belonging to B.E., B.Arch, M. Tech, MBA and MCA.

Prof. S. Ramaiah Institute of Technology organised a farewell function in honour of all outgoing students belonging to B.E., B.Arch, M. Tech, MBA and MCA.

On "Innovations in Computing and Networking" recently. The idea behind the conference was to provide new ideas to research and deal with the use of new technologies, methodology, design and the development of different computing platforms.

The keynote speech of the conference was Prof. Satya Roy from the National Institute of Advanced Studies, India Statistical Institute, Kolkata.

Out of 220 papers submitted, only 120 were accepted. Prof. Roy spoke on "Computing Technologies, Cryptography and Quantum Vibrations". In the afternoon session, Prof. Manishankar from Mahatma University spoke on "Importance of Open Source Software Computational Tools in Research". This was followed by a panel discussion on "OT Challenges and Preferences".

On the second day of the conference, there was a talk by Dr. Pothuri Raj on "Using Real-time IoT Data analysis through Big Data, Device, Cloud".

This was followed by a talk by John Heydon on "Introduction to Mathematics of Quantum Computing".

## Govt. to define 'new employees' for EPS

SOMESH JHA

**NEW DELHI:** The government is likely to come out with a definition for the term 'new employees' for implementing its Budget promise of footing the bill for pension scheme contribution in a bid to create more formal sector jobs.

Accordingly, 'new employees' may be defined as those in excess of the average employee base of a firm for the previous three years, a senior labour ministry official said.

### Reimbursement

"The payment of the EPS contribution will be in the form of reimbursements to employers. The scheme will be applicable for the new employees, earning Rs.15,000 a month, who have worked for 240 days during a year in an establishment," the official said.

About 3.5 lakh establishments, which hire more than 20 workers, will be covered

under the scheme, ministry officials said.

Mantri Rojgar Protsahan Yojana.

"Employment tax subsidy has been tried in Western countries on a limited scale.

"The scheme looks good but it will increase regulation in the labour market which firms would not prefer as there will be increased scrutiny of their books," said K.R. Shyam Sundar, professor of human resource management at **XLRI** Jamshedpur.

### Regulatory fear

The Finance Minister had said the government had decided to pay 8.33 per cent of wages to Employees Pension Scheme (EPS) on behalf of employers for workers during first three years of employment for which an allocation of Rs.1,000 crore had been made in the Budget under the scheme, Pradhan

## Paytm eyes grads hit by Flipkart delay

Digbijay Mishra  
@timesgroup.com

**Bengaluru:** Flipkart's rival Paytm may bail out graduates from Indian Institutes of Management (IIMs) whose joining dates have been deferred by India's largest e-tailer. The digital payments and commerce platform said it is extending support to these students and is ready to interview them for jobs at the Noida-based firm.

"Recommendations started pouring in after some stu-

ed to conduct interviews and select top talent from among these graduates. In terms of timing, it fits well with our requirements as some freshers from IIMs, **XLRI**, Indian School of Business are joining us in the coming days," Amit Sinha, VP at Paytm, told **TOI**.

Alibaba-backed Paytm is learnt to have hired about 50 students from the country's leading management institutes. It has a total employee base of about 4,000.

Earlier, IIM-Ahmedabad had written to Flipkart ex-

pressing displeasure over the company's move to defer the joining date of its graduates who were given job offers by the e-tailer. IIMs are trying to resolve the issue by talking to Flipkart but the e-commerce major has said it is in no position to absorb the freshers before December. Flipkart has said it will pay a compensation of Rs 1.5 lakh, which is also a point of contention between the two parties.

Facing a funds crunch, most startups have been cutting wage costs to improve unit economics and shave off losses.
